PROFILE

Frontend Engineer with experience in building scalable and user-friendly web applications. Skilled in modern JavaScript frameworks, including Vue.js and React.js, with a strong background in large-scale projects. Additionally experienced in full-stack development with C#.NET, SQL, and Razor Pages, building and maintaining robust backend services and data-driven applications. Adept at collaborating in agile environments, problem-solving, and delivering high-quality code.

WORK EXPERIENCE

HELLENIC PETROLEUM S.A., Thessaloniki

APRIL 2026 -

Frontend Developer

- Solely responsible for all frontend development, covering everything from UI/UX design decisions, implementation and deployment.
- Built and maintained modern web applications using Angular, ensuring responsive interfaces.
- Developed and consumed backend REST API services.
- Collaborated closely with stakeholders to translate business requirements into polished, productive features.

CYTA, Cyprus

AUG 2025 - APR 2026

Full Stack Developer

- Developed and maintained a Razor Pages web application using C# (.NET 10), focusing on modular UI components and efficient data handling.
- Collaborated with VCS(Azure DevOps Git) to manage feature branches and ensure code quality.

ARX.NET, Thessaloniki

JAN 2024 - AUG 2025

Full Stack Developer

- Contributed as a Full-Stack Developer on an internal project using C#, ASP.NET, PostgreSQL, and Redis, developing backend functionality and supporting database integration.

OPAP S.A, Thessaloniki

OCT 2021 - JAN 2024

Full Stack Developer

- Developed and maintained frontend applications using Vue.js, enhancing website functionality and user experience.
- Collaborated with cross-functional teams in an Agile environment, contributing to major projects, including the expansion of the main site with three additional games.
- Worked with two-week sprints, managing and completing tasks in Jira while ensuring high-quality deliverables.
- Created and executed Unit Tests in Bamboo and Azure to maintain code quality and reliability.

- Took ownership of new pages and solo projects, leading development from concept to deployment.
- Gained valuable experience in a fast-paced, enterprise-level environment while being loaned as a frontend developer to OPAPS.A., a leading Greek gaming company.

EDUCATION

Information and Electronic Systems Engineering 2014-2024

School of Engineering – International Hellenic University, Thessaloniki

- Thesis: Created a multiplayer card turn-based game in Unity (C#)

PROJECTS

PHOTO-VIDEOGRAPHER WEBSITE • Kre8tivefilms.com

- Developed and designed a responsive Video and Photography Editor Portfolio website using Vue.js and Vite.
- Styled with TailwindCSS and enhanced with FontAwesome icons and SwiperJS for a dynamic user experience.
- Optimized performance and modularity with Webpack for efficient loading and smooth navigation.
- Integrated backend functionality using C# to optimize performance and dynamically serve images via Cloudflare, enhancing site speed and responsiveness.

WEBSITE FOR CHILDREN WITH DISABILITIES •

MyAbilityLab.com

- Designed and developed a WordPress-based website to support youth with special needs and provide educational resources.
- Implemented functionality using PHP, JavaScript, and custom themes for a polished user experience.
